KEEP UP TO DATE

Between the time you ordered this report—which is only one of the hundreds of thousands in the NTIS information collection available to you—and the time you are reading this message, several *new* reports relevant to your interests probably have entered the collection.

Subscribe to the **Weekly Government Abstracts** series that will bring you summaries of new reports as soon as they are received by NTIS from the originators of the research. The WGA's are an NTIS weekly newsletter service covering the most recent research findings in 25 areas of industrial, technological, and sociological interest—invaluable information for executives and professionals who must keep up to date.

The executive and professional information service provided by NTIS in the **Weekly Government Abstracts** newsletters will give you thorough and comprehensive coverage of government-conducted or sponsored re-

search activities. And you'll get this important information within two weeks of the time it's released by originating agencies.

WGA newsletters are computer produced and electronically photocomposed to slash the time gap between the release of a report and its availability. You can learn about technical innovations immediately—and use them in the most meaningful and productive ways possible for your organization. Please request NTIS-PR-205/PCW for more information.

The weekly newsletter series will keep you current. But *learn what you have missed in the past* by ordering a computer **NTISearch** of all the research reports in your area of interest, dating as far back as 1964, if you wish. Please request NTIS-PR-186/PCN for more information.

Keep Up To Date With SRIM

SRIM (Selected Research in Microfiche) provides you with regular, automatic distribution of the complete texts of NTIS research reports *only* in the subject areas you select. SRIM covers almost all Government research reports by subject area and/or the originating Federal or local government agency. You may subscribe by any category or subcategory of our WGA (**Weekly Government Abstracts**) or **Government Reports Announcements and Index** categories, or to the reports issued by a particular agency such as the Department of Defense, Federal Energy Administration, or Environmental Protection Agency. Other options that will give you greater selectivity are available on request.

The cost of SRIM service is only 45¢ domestic (60¢ foreign) for each complete

microfiched report. Your SRIM service begins as soon as your order is received and processed and you will receive biweekly shipments thereafter. If you wish, your service will be backdated to furnish you microfiche of reports issued earlier.

Because of contractual arrangements with several Special Technology Groups, not all NTIS reports are distributed in the SRIM program. You will receive a notice in your microfiche shipments identifying the exceptionally priced reports not available through SRIM.

A deposit account with NTIS is required before this service can be initiated. If you have specific questions concerning this service, please call (703) 451-1558, or write NTIS, attention SRIM Product Manager.

ACKNOWLEDGMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collectors of the data. The ICPR Council urges all users of ICPR data facilities to follow some adaptation of this statement with the parenthesis indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political Research. The data were originally collected by Charles L. Taylor and Michael C. Hudson. Neither the original collectors of the data nor the Consortium bears any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources, and to facilitate the exchange of information about ICPR participants' research activities, each user of the ICPR data facilities is expected to send two copies of each completed manuscript to the Consortium. Please indicate in the cover letter which data were used.

DATA LISTING

PART I

FRACTIONALIZATION

AND

CONCENTRATION

STUDY DESCRIPTION

The World Data Analysis Program of Yale University collected data for the second edition of the World Handbook of Political and Social Indicators. Charles Lewis Taylor and Michael C. Hudson directed the project designed to generate a comprehensive set of cross-national data. The data collection consists of one file of aggregate data for variables such as politics, economics and education; two files with raw data used in the aggregate data file for construction of inequality indices and fractionalization scores; three files of data for a political event series of eighteen events; and several special computer programs. The data collection project was completed in 1970, and a portion of the data is in the second edition of the WORLD HANDBOOK OF POLITICAL AND SOCIAL INDICATORS published in 1971. The International Relations Archive now holds the entire data collection which is processed as five separate studies. The program files are available in the original form.

This data set contains raw data for nine variables. These data were used to construct the fractionalization and concentration measures that appear in the aggregate data file. The user should consult the WORLD HANDBOOK OF POLITICAL AND SOCIAL INDICATORS, Second Edition, or the ICPR Codebook for the Aggregate Data file for more information about uses of these data.

THE NATION SAMPLE

The 136 nations included are those having a population of one million or more in 1965 and those smaller nations having membership in the United Nations by 1968.

PROCESSING INFORMATION

Processing standards of the Inter-university Consortium for Political Research guided the processing of this study. The processing staff of the International Relations Archive performed a number of standard data manipulations to achieve ICPR-IRA coding standards.

In addition to the standard ICPR operations, the staff recoded the preliminary country codes to conform with both the standard Russett, Singer and Small country codes, (Russett, Bruce M., J. David Singer and Melvin Small, "National Political Units in the Twentieth Century: A Standardized List," The American Political Science Review, 62, 3 (September, 1968) 935-950), and the older ICPR country code. Similarly, the full country name originally appeared on each record. In order to decrease the logical record length, the country name was recoded with the WEIS country name code (Charles McClelland, World Event Interaction Survey, First ICPR Edition - 1971).

Susan C. Cowart processed these data and prepared this codebook.

VARIABLE DESCRIPTION

VARIABLE I

ICPR STUDY NUMBER

The ICPR study number is a standard number assigned to data sets for identification and accounting purposes. The study number for this data set is 7532.

VARIABLE 2

STANDARD COUNTRY CODE

This is the standard International Relations Archive Country Code developed by Bruce M. Russett, J. David Singer and Melvin Small.

| <u>COUNTRY</u> | <u>STANDARD CODE</u> | <u>OLDER CODE</u> | <u>NAME CODE</u> | <u>COUNTRY</u> | <u>STANDARD CODE</u> | <u>OLDER CODE</u> | <u>NAME CODE</u> |

| ✓ South Vietnam | 817 | 417 | VTN | ✓ New Zealand | 920 | 702 | NEW |

VARIABLE 3

OLDER COUNTRY CODE

This is the older code of the Inter-university Consortium for Political Research. See Ref. No. 2 for the list of countries used in this study and their codes.

VARIABLE 4

COUNTRY NAME CODE

This code is a three-letter abbreviated country code. See WEIS EVENT/ INTERACTION SURVEY, Charles McClelland. See Ref. No. 2 for the countries used in this study and the name code.

VARIABLE 5

VARIABLE IDENTIFICATION CODE

The variable identification code is a three digit number which identifies the raw data variables. The nine variables and their codes follow:

| <u>ID CODE</u> | <u>VARIABLE NAME</u> |
|----------------|--------------------------|
| ✓ 061 | City Populations |
| ✓ 06 | Ethnic Groups |
| ✓ 07 | Language Groups, Muller |
| ✓ 08 | Language Groups, Roberts |

| <u>ID CODE</u> | <u>VARIABLE NAME</u> |
|-----------------|---|
| 2 09 | Language Groups, United Nations |
| 3 57 | Export Commodities |
| 3 58 | Export Receiving Countries |
| 4 64 | Distribution of Votes by Party |
| 4 65 | Distribution of Seats in the Lower House by Party |

VARIABLE 6

CASE RECORD NUMBER

This two-digit number indicates the number of the record within a nation's variable group. For example, population figures for five cities in Afghanistan are reported. The variable record number of the first city reported is '01', and for the fifth city is '05'. Note that for each variable group within a single nation a total figure is given. In the case of Afghanistan, this total population record is the sixth entry or record within that variable group. The record containing the 'total' figure has a '99' in this field. A '99' in Ref. No. 6 indicates that the entry is a total of that variable group for a country, with the exception of export commodities. The export commodity total records give units of measure and currencies for exports.

VARIABLE 7

VARIABLE NAME

This variable field contains the alphabetic variable unit name. (For example: "ENGLISH SPEAKERS of the Lesser Antilles" is recorded here with the datum in the "Language Groups" Variable.

VARIABLE 8

DATUM ENTRY

The actual numbers are recorded here. Eg., the population figure of Oslo, Norway (ID 061), the number of Norwegians in the United States

(ID 206), and the number of votes for the Communist Party in Norway in the most recent election (ID 464).

VARIABLE 9

SOURCES AND NOTES

This three-character variable field contains source information and/or data quality evaluations, etc. for several of the variables. Listed below are the variable groups for which this information appears.

(061) CITY POPULATIONS

1st column (75) SOURCES

0 = U.N. Stat. Off. Dem. Y.B. 1966

1. EUROPA YEARBOOK, 1966
2. THE STATESMAN'S YEARBOOK, 1966-1967
3. EUROPA YEARBOOK, 1967
4. THE STATESMAN'S YEARBOOK, 1967-1968
5. Moshe Y. Sachs, ed., THE WORLD MARK ENCYCLOPEDIA OF NATIONS (Harper and Row, 1967)
6. HAMMOND CONTEMPORARY WORLD ATLAS, 1967
7. RAND-McNALLY NEW COSMOPOLITAN WORLD ATLAS, 1965

2nd Column (76) DATA QUALITY

- E. estimates
- F. estimate of questionable reliability
- *. provisional
- blank . inapplicable

3rd Column (77) UNIT TYPE

- A. city proper, legal limits
- B. urban agglomeration
- C. smallest administrative unit
- .. unknown

(206) ETHNIC GROUPS

1st column (75) SOURCES

- 0 ATLAS NARODOV MIRA (Moscow: The N.H. Miklukho-Maklaya Institute of Ethnology of the Academy of Sciences, Department of Geography and Cartography of the State Geological Committee of the U.S.S.R., 1964).

VARIABLE 10

DATES

The last two digits of the year applicable to the data in Ref. No. 8.

ORGANIZATION OF THE DATA

The data are arranged such that the variable-record is the unit of analysis. Within each of the nine variable groups are the separate records for each city population, export commodity, political party, etc. within a country. The data are sorted first in ascending order of the variable identification code; second in ascending order of the standard country code; and, finally in sequential order of the variable record number.

The data recorded in Variable 8 originally contained decimal points in varying locations. The location of the decimal point was made to be fixed with 3 decimal digits implied. This expanded the field width of this variable to 12 characters - more than can be accommodated in OSIRIS. The decision was made to retain all 12 characters for the variable, and, therefore, not

filebuild the data set, i.e. not produce an OSIRIS data set. The listing in this codebook is an exact list of the data that will be provided the users in card-image format.

VARIABLE FORMAT

| VAR NO. | VARIABLE NAME | TAPE LOCA- TION | FIELD WIDTH | MISSING DATA CODE |
|------------|---------------------------------|-----------------------|-------------------|-------------------------|
| 1 | ICPR Study Number | 1 | 4 | |
| 2 | Standard Country Code | 5 | 3 | |
| 3 | Older Country Code | 8 | 3 | |
| 4 | Country Name Code | 11 | 3 | |
| 5 | Variable Identification Code | 14 | 3 | |
| 6 | Case Record Number | 17 | 2 | |
| 7 | Variable Unit Name | 19 | 44 | |
| 8 | Datum Entry | 63 | 74 / 2 | |
| 9 | Notes and Sources | 75 | 3 | |
| 10 | Dates | 78 | 2 | 99 |

NOTE: Card-image data have column locations which are the same as the tape locations given above. For example, Variable 8 is located in columns 63-74, Variable 10 is located in columns 75-76, and so on.

Following is a listing of the data. This listing is in the format described above.

PART II

I N E Q U A L I T Y I N D I C E S

155
STUDY DESCRIPTION

The World Data Analysis Program of Yale University collected data for the second edition of the WORLD HANDBOOK OF POLITICAL AND SOCIAL INDICATORS, II. Charles Taylor and Michael Hudson directed the project designed to generate a comprehensive set of cross-national data. The data collection consists of one file of aggregate data for variables such as politics, economics and education; two files with raw data used in the aggregate data file for construction of inequality indices and fractionalization scores; three files of data for a political event series of eighteen events; and several special computer programs. The data collection project was completed in 1970, and a portion of the data is in the second edition of the WORLD HANDBOOK OF POLITICAL AND SOCIAL INDICATORS published in 1971. The International Relations Archive holds the entire data collection which is processed as six separate sections.

This dataset contains the percentage figures that represent the distribution of acreage, gross domestic products, farms and the labor force. These data were used in calculating the measures of inequality presented in the Aggregate Data File. (SEE: AGGREGATE DATA FILE, Section I, Inter-university Consortium for Political Research Codebook, First Printing, 1971.

The measures of inequality presented were calculated using a pair of records for each available set of country data. One record contained the distribution of goods (acreage or gross domestic product) and the other the distribution of the population holding these goods (farms or the labor force).

Inequality of income distribution was calculated by using the divisions of gross domestic product and of labor force by economic sectors. The results of these divisions are presented here as the percentage distributions.

154

The sectoral distributions are based on the International Standard Industrial Classification of the United Nations. There are a total of 8 sectors:

0. agriculture, forestry, hunting and fishing
1. mining and quarrying
- 2-3. manufacturing
4. construction
5. electricity, gas, water and sanitary services
6. commerce (wholesale and retail trade, banking, insurance and real estate)
7. transportation, storage and communication
8. services

Farms are divided into categories or sectors according to size. The number of acres and the number of farms in each sector are used to derive the measures of inequality. Some sectors are those reported by the individual countries and vary greatly. The others are a standardized set of six sectors.

THE NATION SAMPLE

The 136 nations included are those having a population of one million or more in 1965 and those smaller nations having memberships in the United Nations by 1968.

157

VARIABLE DESCRIPTION

Variable 1

ICPR STUDY NUMBER

The ICPR study number is a standard number assigned to the project for identification and accounting purposes. The study number for this dataset is 7535.

Variable 2

STANDARD COUNTRY CODE

This is the standard International Relations Country Code developed by Bruce M. Russett, J. David Singer and Melvin Small.

The following list is of the entire nation sample used in the WORLD HANDBOOK OF POLITICAL AND SOCIAL INDICATORS. Not all countries in the sample are represented in this dataset -- only those for which data were available.

| <u>COUNTRY</u> | <u>STANDARD CODE</u> | <u>OLDER CODE</u> | <u>COUNTRY</u> | <u>STANDARD CODE</u> | <u>OLDER CODE</u> |

Variable 3

OLDER COUNTRY CODE

This is the older country code of the Inter-university Consortium for Political Research. See Variable 2 for the list of countries and codes.

Variables 4 - 17

PERCENTAGE DISTRIBUTION: SECTOR ONE - SECTOR FOURTEEN

This variable records the actual percentage figure for the good or holder of the good indicated by variable 19. The user is referred to the STUDY DESCRIPTION in this codebook for a discussion of this entry.

Variable 18

NUMBER OF SECTORS

This variable records the number of sectors for which data were available for a country for that variable-type (goods or holders). The maximum number of sectors recorded here is 14.

Variable 19

IDENTIFICATION VARIABLE CODES

This identification variable code represents the specific goods or holders of goods for which Variables 4-17 report the percentage distribu-

101
tions by sector. Following is a list of the goods and holders of goods included and the identification variable code recorded in the data.

- 61 percentage distribution of numbers of farms
- 62 percentage distribution of acreage
- 71 percentage distribution of labor force by sector -
excluding unpaid family workers
- 72 percentage distribution of Gross Domestic Product
at factor cost by sector
- 73 percentage distribution of male labor force by sector
- 74 percentage distribution of total labor force by sector
- 81 percentage distribution of number of farms - six
sectors
- 82 percentage distribution of acreage - six sectors

162

ORGANIZATION OF THE DATA

The unit of analysis is the country/identification variable. For each country included, there is a possible total of 8 ~~records~~ ^{cases}: one for each of the identification variables listed in Ref. No. 19. There are usually only two or three records for each country, but the number of records varies among the countries. One data case for example, might be the percentage distribution of number of farms in Afghanistan, another the percentage distribution of total labor force by sector in France. There are a total of 334 records.

The data are arranged in ascending order of the Standard Country Code and, secondly, on the Identification Variable Code (Ref. No. 19).

VARIABLE FORMAT

| <u>Variable Number</u> | <u>Variable Name</u> | <u>Tape Location</u> | <u>Field Width</u> | <u>Decimal Places</u> | <u>Missing Data Codes</u> |
|------------------------|-----------------------------------|----------------------|--------------------|-----------------------|---------------------------|
| 1 | ICPR Study Number | 1 | 2 | | |
| 2 | Standard Country Code | 3 | 3 | | |
| 3 | Older Country Code | 6 | 3 | | |
| 4 | Percentage Distribution: Sector 1 | 9 | 5 | 2 | -0000 |
| 5 | Percentage Distribution: Sector 2 | 14 | 5 | 2 | -0000 |
| 6 | Percentage Distribution: Sector 3 | 19 | 5 | 2 | -0000 |
| 7 | Percentage Distribution: Sector 4 | 24 | 5 | 2 | -0000 |
| 8 | Percentage Distribution: Sector 5 | 29 | 5 | 2 | -0000 |
